SOLUBLE PRODUCT

MATRIX

This is a product matrix displaying Vetafarm's range of water soluble products. It simply shows which products can be mixed together within the same drinking water.

To use the matrix select the product you are using from the first column on the left. Follow the row along until it intersects with the second product you wish to use.

If the box has a ✓ then you can safely use both the products in the same drinking water.
If ✗ then do not mix the products.
